COLLOQUIUM

“Assessing environmental public health in the Southern Peruvian Amazon: Mercury exposure, diet and nutrition in a region of small scale gold mining and highway development”

By

Beth J. Feingold, Ph.D.
Dept. of Environmental Health Sciences
School of Public Health
University at Albany, SUNY

Friday, March 4, 2016
3:30pm

Business Administration Building, Room B-29
University at Albany, SUNY (Main Campus)

Dr. Feingold’s research interests include global environmental health, with a focus on the use of spatial epidemiologic methods. Dr. Feingold conducts interdisciplinary research to understand disproportionate risks of disease, particularly due to variations in environmental characteristics. Dr. Feingold’s interests are particularly in issues related to industrial food animal production, climate, land use change, environmental justice, and urban environmental health. Dr. Feingold is a senior fellow with the Environmental Leadership Program and was a Science Communication Fellow with Environmental Health Sciences in 2012.
