“Spacial vs. Social Distance in the Diffusion of Fertility Decline: Evidence from Sweden 1880-1900”

By

Martin Dribe, Ph.D.
Professor of Economic History
Director, Center for Economic Demography
School of Economics and Management, Lund University
Visiting Scholar, Cornell Population Center, Cornell University

Friday, November 6, 2015
3:30pm

Business Administration Building – Room B-29
University at Albany (Main Campus)

Martin Dribe is professor of Economic History and Director of the Center for Economic Demography at the School of Economics and Management, Lund University, Sweden. He is currently on sabbatical leave at the Cornell Population Center. His research focuses on historical and contemporary economic demography and deals with mortality, fertility, marriage, and social mobility. Most of the research involves longitudinal micro-level data and he is currently PI for the Scanian Economic-Demographic Database. His work has been published in leading demography and economic history journals, such as Demography and Economic History Review.
