“Agent-based models as agents of change? Simulations to reduce violence and its consequences”

By

Melissa Tracy, PhD, MPH
Assistant Professor
Department of Epidemiology and Biostatistics
School of Public Health
University at Albany (SUNY)

Friday, February 10, 2017
3:30 pm

Business Administration Building
Room B-29 (Basement Level)
University at Albany – Main Campus

Dr. Tracy’s main research interests include the social determinants of violence, mental health, and substance use. She is particularly interested in the transmission of violence and mental health problems within families and social networks. She has developed several agent-based models aimed at understanding the complex processes that generate inequalities in exposure to trauma and violence.

Light refreshments will be served.
