University at Albany**

Dr. Parnell received his PhD from the University of North Carolina at Chapel Hill and has published numerous articles in academic journals. Cedar Grove Institute for Sustainable Communities grew out of work he did at his for-profit company, McMillan and Moss Research, Inc. It enables the corporation's investigative skills, demographic and land-use expertise, and use of geographic information systems (GIS) to be affordable for cases involving civil rights, predatory lending, and fighting institutionalized discrimination.
