

# Would your research benefit from access to better data?

Center for Social and Demographic Analysis is sponsoring:

## Research Opportunities Using the New York Confidential Research Data Center

A seminar led by

**Diane Gibson and Jonathan Fisher**  
Executive Director and Baruch RDC Administrator

**Friday, March 30, 2012**  
**1:30 pm**

**Business Administration Building, Room B-29**  
**University at Albany – Main Campus**

The New York Census Research Data Center (NYCRDC) provides academic researchers a unique opportunity to access selected confidential microdata in physically secure facilities at [Cornell University](#) and at [Baruch College](#). The NYCRDC houses data from three main sources: U.S. Bureau of the Census, National Center for Health Statistics (NCHS) and the Agency for Healthcare Research and Quality (AHRQ).

<b>CENSUS</b>	<b>NCHS</b>	<b>AHRQ</b>
<b>Economic:</b> Economic Censuses, Annual Survey of Manufacturers, Foreign Trade, Longitudinal Business Data Base, etc. <b>Demographic:</b> ACS, AHS, CPS, NLS, SIPP as well as decennial products and other survey data.	Includes NHANES, Ambulatory Medical Care, Health Interview, Nursing Home, NSFG, Vital Statistics, and many linked data sets as well as others.	Includes medical expenditure panel data sets on households, nursing homes, and medical providers. AHRQ creates a special extract for each research project.

A complete list of the data sets is available at: [http://ciser.cornell.edu/NYCRDC/census\\_data.shtml](http://ciser.cornell.edu/NYCRDC/census_data.shtml)

**Reception following talk**
