*Are changes in neighborhood composition
followed by changes in disease rates?
A 10 year longitudinal study
in New York State*

by

Louise Ann McNutt

Department of Epidemiology and Biostatistics
School of Public Health
University at Albany

**Friday, February 9, 2007 at 3:30 pm
CSDA Library - BA B-29
University at Albany**

Professor McNutt's research is in the area of infectious disease epidemiology, including the health effects of violence, particularly intimate partner violence, and the prevention of HIV and sexually transmitted diseases, in the U.S. and Eastern Europe.
