

# CSDA Spring Workshop 2016

## Introduction to SAS

Instructor: Jeffrey Napierala, Data Analyst, CSDA

Date and location: Friday, April 8, 2016  
2:00 pm - 5:00 pm  
AS013 (Arts & Sciences Building– Basement Level – Main Campus)

SAS is a widely used software program that allows users to access, manage, and analyze data. In this workshop the instructor will explore how to use SAS for simple data analyses. Numerous examples will be provided and attendees will be given opportunities to experiment with sample code. The topics will include, but are not limited to, importing, recoding, and transforming data, and creating tables, computing univariate statistics, and running simple regression models.
