COLLOQUIUM

"The Upstate New York Infant Development Screening Program"

by

Erin Bell, Ph.D.
Associate Professor
Department of Environmental Health Sciences
School of Public Health, University at Albany

Friday, March 23, 2012
3:30 pm

Business Administration Building, Room B-29
University at Albany – Main Campus

Dr. Bell's research interests include environmental and occupational epidemiology, environmental exposures and their relation to adverse reproductive and childhood outcomes, agricultural health, and the use of geographical techniques for environmental exposure assessment. She directs the Upstate Kids project which is examining whether prenatal and early childhood exposures as well as parental medical history, including infertility, are associated with developmental problems in their children. She was appointed by the Institute of Medicine to serve on the Committee to Review the Health Effects in Vietnam Veterans of Exposure to Herbicides.

Reception following talk
